

10 A-list inspired beauty treatments to try this year

BY [ARIANNA CHATZIDAKIS](#) | POSTED ON 17 04 2019

Our love for beauty treatments has no bounds. Yep - we thoroughly relish in getting our nails done, our hair styled and our eyebrows threaded to perfection. If you're after some new A-list inspired beauty treatments to try, or you just want to discover what the celebs are having done, you've come to the right place...

The Lumenis NuEra

The new Lumenis NuEra Tight system is a temperature-controlled radiofrequency device that helps to improve the contour of your face, and smooth the appearance of cellulite on the body. Aesthetician [Renee Lapino](#) offers this treatment in her boujee clinic in Notting Hill, and she told *heat*: "It's a remarkable device - when I got my hands on it I was completely blown away. After one treatment the face is noticeably contoured, and the body feels smoother and tighter, with an obvious softening of cellulite tissue. As with all radio frequency, a course of treatment is recommended, but because of the depth of treatment, with the exception of cellulite sessions need only be carried out every two weeks!
